MEDIA MANAGEMENT SYSTEM

Emily Weed

WHAT IS IT?

The Media Collection Management System (MCMS) is built to organize and manage collections of books, movies, and music. It's designed for individuals, collectors, small businesses, and can be expanded for larger organizations. The system tracks ownership, metadata, and loans, making it easy to manage even large inventories.

TARGET USER

Typical Customers:
- Owners,
- Administrators,
- Customers,
- Users

The system will be ideal for:
- Libraries
- Rental Stores
- Media Collectors
